MARY JUDGE

Statement: *Exotic Hex Series*

My interest in circular or radial forms began as a natural outcome of working with bilateral structures. The internal implied point in this work, is the origin from which all forms expand and around which it rotates. At the same time this point is fully stable and fixed. Energy and movement is constrained to this center so that accidents and random effects of the process are contained in much the same way it is in our galaxy. This form presents endless possibilities that fold and collapse back to the "magic" center.
